

Project Title -18	Design and development of energy management information system for textile textile industry – phase II
Principal Investigator	A. Sivaramakrishnan
Cost	Rs.42.22 lakhs
Date of Commencement	01.09.1999
Duration	24 Months
Date of Completion	Sep 2001
Abstract	Energy cost is one of the largest components of conversion cost incurred by spinning mills. At present energy related data of textile machines are collected manually. Online information on the other hand provides quick, continuous and accurate results, which is very helpful in decision making. SITRA was involved in developing the energy information system.
Highlights	Better energy management in the textile Industry
Area of applicability	All type of textile industry
Target beneficiaries	All the SITRA member mills
Status	Completed
Name of Licence	M/s Moreind Energy System 131, Amman Nagar, Saravanampatty, Coimbatore – 641 035
